IAP OPERATIONS OVERVIEW 2017-18

The previous year saw the development of a new strategic plan for IAP, focusing on four key areas:
  - Access, Diversity, and Inclusion
  - New Program and Initiatives
  - Cross Campus Partnerships and Communication
  - Office Climate and Development
This year, IAP has implemented core strategic working groups for each of those four areas, comprised of all study abroad office staff.

Another core focus of 2017-18 was increasing our collaborations and support of study abroad campus-wide to better serve students and meet compliance needs for the university, culminating with the signing of a cooperation MOU with the Wisconsin School of Business in Summer 2018 and with the College of Engineering at the end of the year.

IAP also successfully completed a 10-year administrative unit review by the International Division, both confirming the quality of the work that IAP performs, as well as making solid recommendations for future development that have been integrated into our strategic plan with continued emphasis on campus-wide communication and development of study abroad as an integral academic endeavor for UW Madison students.
